

# INDIA FARM-LEVEL YIELD INSURANCE FOR SMALLHOLDER FARMERS

WRMS offers SecuFarm - the solution guarantees farmers a benchmark yield provided they follow the Package of Practice (PoP) shared with them on the SecuFarm app. If the actual yield is still below the benchmark yield due to any extreme weather attack or crop disease, the farmer is compensated in proportion to the shortfall. This innovative concept allows incorporation of the necessary farm level risk reduction measures in the insurance product design offered by insurance companies and incentivises smart and sustainable farming practices. This in turn allows offering fee discount or a higher guaranteed yield to farmers who take the necessary farm level risk management measures.

#### **PRODUCT CHARACTERISTICS**

Target group

Target region

Insured asset

Insured peril/ hazard

Insurance type

Own contribution (in %)

Smallholder farmers (average field size two ha)

Jharkhand, Punjab, Haryana, Andhra Pradesh, Telangana, Uttar Pradesh, Gujarat, Madhya Pradesh, Rajasthan, Karnataka and Maharashtra

Agricultural production, loss of yield

Drought, excessive rainfall, pest attack; multi-risk (for indemnity-based livestock product)

Micro-scheme

Scale up of existing insurance solutions

53.4 % (of total ISF project costs)

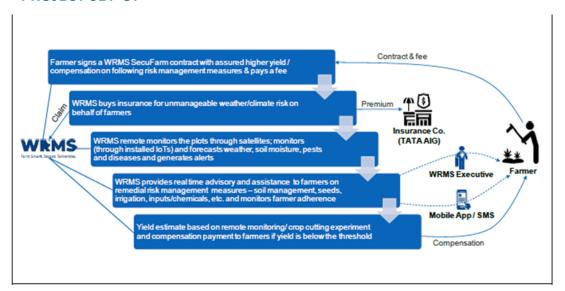

## PRODUCT DEVELOPMENT ACTIVITIES SUPPORTED

Scale up of SecuFarm product for crops such as cotton, chili, paddy rice, wheat and potato

- Identification of 1,000 new villages through field staff and partners
- Risk modelling and analysis for each village and crop
- Data collection of soil, irrigation, and other key risks through field surveys
- Training of distribution channels
- Farm awareness campaigns and capacity building
- Investments in infrastructure (weather stations, soil moisture sensors, IT)

### **PROJECT SET-UP**

## **PROJECT PARTNERS**

**Demand Side**
