

NIGERIA PROJECT BRIEF

The Global Risk Modelling Alliance is initiated by the Vulnerable Twenty (V20) Group and Insurance Development Forum (IDF), and is hosted by the InsuResilience Solutions Fund (ISF). The GRMA is a public-private partnership that brings access to climate and disaster risk insight to vulnerable countries, working with ministries as well as local actors from private sector and academia for capability development. It focuses on:

01

Good quality and more granular risk data to help with targeted disaster risk response and planning.

02

Locally adjusted models for prioritized hazards.

03

Capability development to build sustainable, autonomous risk analytics to guide, incentivize, and accelerate public and private sector investments.

Scope of Request for Support

Hazards

Flood

Drought

Sector

Population /
livelihoods

Agriculture
(Staple crops)

Infrastructure

Region

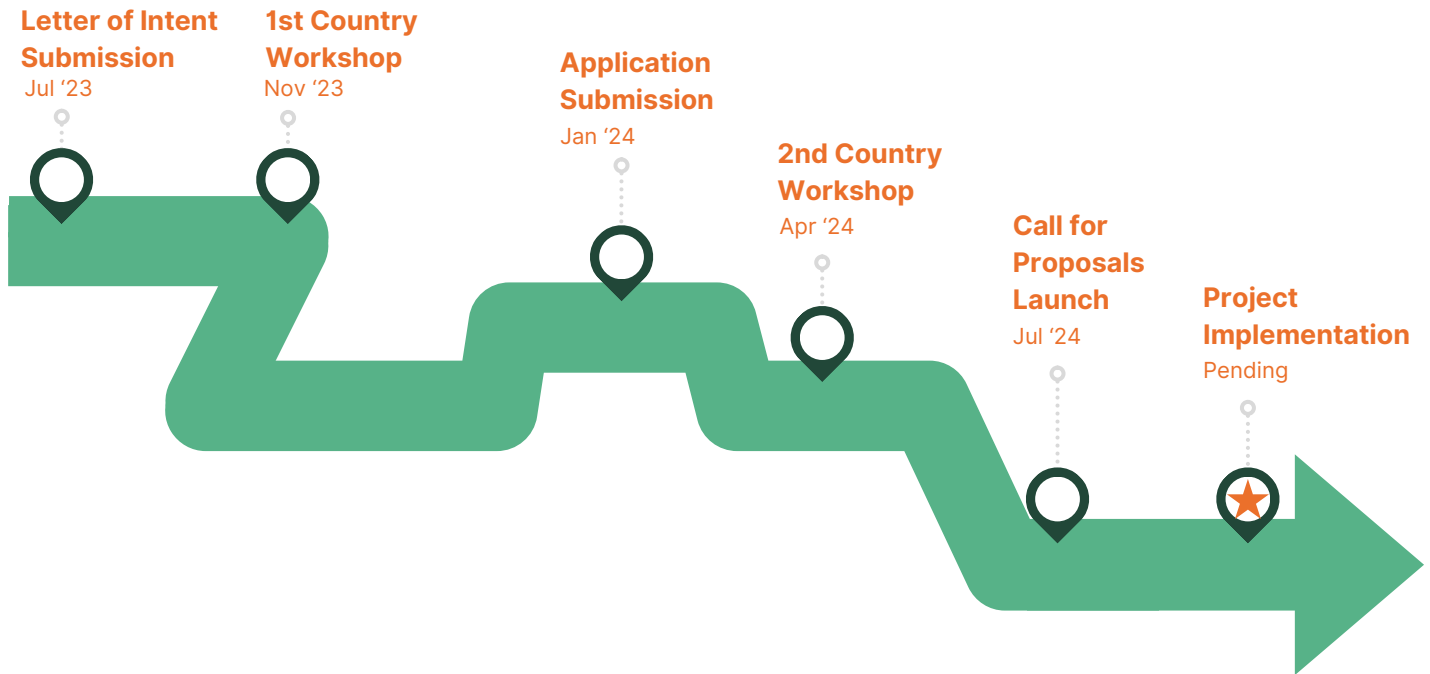

Urban and rural
areas for flood

Region to be
selected for
agriculture

Timeline

Support Areas

- Fluvial flood hazard modelling with national coverage and risk assessment for aggregated view of exposures.
- More targeted agricultural drought modelling for food security.
- Modelling flood risks to vulnerable communities and disabled persons to promote an inclusive Disaster Risk Management (DRM) approach.

National Partner

- ✓ National Council on Climate Change (NCCC)
